ABOUT US

Basis North America INC.

SERVICE AGENCY FOR THE OIL & GAS AND POWER GENERATION INDUSTRY

Basis North America INC. is an Independent Service Agency established in Texas, in 2017 and it is part of **Basisgroup**, an association of companies operating worldwide since 1995.

Basisgroup 2000s Coverage Expansion

The Shareholder of **Basis North America Inc.** is **Basis Plant Services S.r.l.** operating since 2000 in the Oil & Gas and Power Generation Industry providing Technical Service to OEMs, EPC, O&G companies, industrial and power plants.

With:

- **Almost 20** years of experience
- **100** employees
- and more than **50** technical specialists

Our Mission

Maintenance Customized Services

***Speed, Flexibility and Professionality for OEM, EPC
and Final Customers... with
High Quality, Expertise and competitiveness***

Activities

- **HSE Training Programs**
Basic and advanced levels of courses in fundamentals and specializing subjects for different targets. We provide short and long term customized modules for any kind of training requested.
- **HSE Integrated Management System**
Our specialists can carry out the development, implementation and control of Integrated Management System in compliance with ISO 14001 and OHSAS 18001. We have certified Auditors to prove legislative compliance, Corporate HSE compliance and HSE project compliance.
- **HSE Supervision/Coordination**
We provide our experience in supporting the HSE Manager and team with planning, coordination and improvement of existing HSE policies, guidelines and procedures. We take care of safety, occupational health and environmental issues developing and implementing specific EHS programs and procedures.
- **Occupational and operational safety**
Our specialists can carry out the screening in accordance with accident prevention regulations. We provide our support in the evaluation of accidents or in occupational diseases and in the emergency planning. We are able to perform workplace measurements for noises, lighting, vibrations, electro magnetic fields, ambient climates etc. with proper instruments.
- **Environmental Assessment**
Our specialists can develop (Preliminary) Environmental Impact Assessment (PEIA and EIA) and Environmental, Health and Social Impact Assessment (EHSIA) and can carry out Integrated Pollution Prevention Control (IPPC) Permitting. We provide our experience in noise & vibration modeling (3D modelling and mapping), atmospheric pollutant dispersion modeling, Greenhouse gas emissions assessment and Environmental Due Diligence in Merge & Acquisition cases.
- **Industrial Safety**
We can perform specific activities as Quantitative Risk Assessments (QRA) HAZID, HAZOP Reviews, Fire and Explosion Simulation, Toxic Gas, Smoke and Soot Dispersion by means of Computational Fluid Dynamics (CFD) or simplified methods (Phast). Our specialists can carry out SIL (Safety Integrity Level) Analysis and Verification, FMEA (Failure Modes and Effects Analysis) Studies, Fire & Gas (F&G) mapping and Human Factors Assessment.
